APPENDIX 4: Matrix definitions

Matrix = womb, place of origin, uterus, cradle

(“the place in which anything is nurtured in its earliest stage,” Oxford Dictionary).

Source; cause; grid, chessboard pattern.

Definitions:

“The womb. A place or enveloping element within which something originates, takes form, or develops...That which gives form, origin, or foundation to something enclosed or embedded in it.” (Webster)

“A matrix is a schematic model of order. It has columns and rows or lines, which are constructed according to definite rules. The essential requirement is that all the elements in a column or in a row possess a common characteristic.” (Z. Dienes and E. Golding: Mathematisches Denken und logische Spiele, Herder 1966)

“A rectangular array with systematic entries.” (Prof. Luft)

“A matrix is an arrangement of values in lines and columns.” (Prof. Müller-Markus: Wo die Welt nochmals beginnt, p. 279)

APPENDIX 5: Matrix formula

Matrix: a rectangular array with two current indices

Formula: A_{ij}

A = subject

i = column index (dominant)

j = line index

APPENDIX 6: Matrix element*Definitions:*

“A matrix is a rectangular arrangement of elements.”

“An element is a primary component, in the sense that it is not possible to divide an element and at the same time retain the properties which are relevant to the associative context. Elements form the constituent parts of magnitudes; their interrelation constitutes the structure of a magnitude.”

“Matrices afford a more accessible general view of the functional interconnections of elements within a system.” (Lexikon der Planung und Organisation, 1968)

APPENDIX 7: Value of elements

algebra: $ab = ba$
 $wx = xw$

matrix: $ab \neq ba$
 $W/X \neq X/W$

*W/X = Word as Christ

X/W = Christ as Word

APPENDIX 8: Matrix purpose*Definitions:*

“...the word “matrix” (denotes) any ability, habit, or skill, any pattern of ordered behavior governed by a ‘code’ of fixed rules” (Koestler: The Act of Creation).

A matrix is an aid to remembering the succession of operations. It needs few symbols, as each symbol acquires a special meaning according to its particular box within the grid.

“Matrices themselves provide a very powerful condensed language in which complicated mathematical statements can be expressed simply” (Evelyn Sharp: The Parent’s Guide to the New Mathematics).

“A matrix is important for categorial, relational, and structural thinking” (Z. Dienes and E. Golding: Mathematisches Denken und logische Spiele, Herder 1966).

“A matrix is a means to the most economic representation” (Mathematik-Duden für Lehrer, Mannheim, 1969).

“A purely conceptual, not an observable, construct...superceding the last traces of physical detectability” (Prof. Müller-Markus)

- aids structure recognition
- provides a cognizable over-all view
- acts as a memory support
- is a steering mechanism

*This matrix, developed over the years by John W. Doorly, has since been elaborated. on Specifically, the “i” and “j” indices have been defined as shown in the parentheses; also the matrix as a whole is seen as the Word-matrix. This matrix is based on the fundamental orders of the synonymous terms for God as given in the Christian Science Textbook, *Science and Health with Key to the Scriptures* by Mary Baker Eddy. It illustrates the scientific way in which each divine order reflects the others. The ordered statements of the synonymous terms occur on the following pages of the Textbook: 465:10; 115:13–14; 587:6–7.

Synopsis:

This class gives a clear and basic introduction to what constitutes a matrix and how matrices can be used in Christian Science as a tool for understanding the whole of Being. This class is designed for students who are well acquainted with the three categories comprising the system of Christian Science.

Mary Baker Eddy refers to the “matrix of immortality”—the matrix of Being. In all sciences, matrices are a scientific tool for presenting a complex subject in a clear and concise way. Matrix work cultivates our ability to reason in categories and relationships, and aids in recognition of structure. Once this structure is recognized, matrices can act as a guide for creative thinking and lead to greater insight.

Contents:

Introduction to “matrix” (definition, matrix-elements, their purpose and characteristics, etc.)

History of the development of the matrix in Christian Science

- the 7x7 matrix, the 4x4 matrix, the “Platform” matrix
- development of the “Doorly matrix” (the Word-matrix)

The biblical Prophets in their matrix form (the Christ-matrix)

The biblical Epistles in their matrix form (Christianity-matrix)

Science and Health in its matrix form (the Science-matrix)
