1-A	Introduction
1-B	The spiritual idea impelling the acceleration of mutations <ul style="list-style-type: none"><li>♦ examples: population explosion, increased life-span, total knowledge, scientists, science periodicals, validity of world-image; vocabulary, intensification of consciousness, growth in energy available</li><li>♦ the vertical (exponential growth) is the sign of the spiritual, breaking through the horizontal way of thinking.</li></ul>
2-A	Stages in the development of consciousness
2-B	1. Atomistic thinking ...continued

**Prism and Lens:  
An Explanation of Mary Baker Eddy's Statements**

**“Science is the prism of Truth, which divides its rays and brings out the hues of Deity.”**  
 (Ret. 35:13–14)

**“The lens of Science magnifies the divine power to human sight; and we then see the allness of Spirit, therefore the nothingness of matter.”**  
 (’01 12:22–24)

**“The rays of infinite Truth, when gathered into the focus of ideas, bring light instantaneously...”**  
 (S&H 504:23-24)

**“Delusion, sin, disease, and death arise from the false testimony of material sense, which, from a supposed standpoint outside the focal distance of infinite Spirit, presents an inverted image of Mind and substance with everything turned upside down.”**  
 (S&H 301:24–29)

## Structure

<i>structura</i>	=	to arrange; to fit together (system = to place together)
structure	=	the interrelationships of parts as dominated by the general character of the whole. (Webster)
	=	the sum total of relationships which maintains the communication between the different parts of the whole. (Prof. Amar)

## Attitude

### *Structural*

has the whole in view  
considers structure  
always has a new perspective  
center: the whole  
the whole has its own solution

### *atomistic*

narrow-mindedness  
engulfed in details  
pedantic  
routine  
repetitive  
center: personal "I"  
meets our own desires
